RE: Proposed amendment to previously approved development under REG. REF. TA 190892.
At Longwood Co. Meath.
Client: Elderwood Construction Ltd.

To whom it may concern,

Please find attached proposed amendment to previously approved development under REG. REF. TA190892 at Longwood Co. Meath.

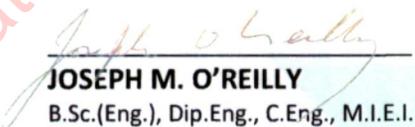

The amendment will consist of:

- 1) Reduction of house numbers from 36 number to 35 number.
- 2) Revised site boundaries and revised site layout
- 3) Inclusion of a temporary Wastewater treatment system

The layout of the surface water & foul networks has changed slightly to accommodate the temporary wastewater treatment system which is required due to lack of available capacity in the Longwood WWTP. Due to the addition of the temporary waste water treatment system the proposed diversion of the existing foul & surface water services that flow through the subject site has changed slightly to eliminate potential clashes with new services. The surface water network is the same apart from location changes of manholes and pipelines. The foul network layout is the same apart from the inclusion of the wastewater treatment system and location changes of manholes and pipelines. The watermain and road design have been revised to include the revised site layout but are the same design as the initial planning application TA190892.

Should you require any further information, please do not hesitate to contact me.

Yours faithfully,

JOSEPH M. O'REILLY
